Important Reasons

Why Herring-Hall-Marvin Safe Co. Safes and Locks are the Best.

The concrete filling makes these safes absolutely fire proof and positively damp proof. The solid angle corners add greatly to their security in time of fire and form the only solid corners made. The patent Bolt Work is superior to any in use and does not require the constant oiling, cleaning and repairs that is acknowledged in other makes of safes. That although 600,000 of these safes are now in use and many thousands have been tested by some of the most disastrous conflagrations in the United States, there is not a single instance on record wherein one of them ver failed to preserve its contents perfectly. They make safes for county treasurers, county recorders, county clerks, jewelers, hotels, residences, churches and corporations. We have a large assortment of safes on hand and will be pleased to show same.
